

---

## Technical Skills

**Languages:** C++, C, Python, Java, JavaScript, R, HTML/CSS, Racket, ARM Assembly, SQL

**Tools/Environment:** Excel, Unix/Linux, Git/GitHub, PowerBI, VS Code, Jenkins, IntelliJ, RStudio, Jupyter Notebook, Node.js

**Frameworks/Libraries:** React, JUnit5, Unittest, Valgrind, Java Swing, Matplotlib, Chart.js, Vite, Ansible, Docker

---

## Technical Experience

**Data Analyst Intern** | Python, Web scraping, REST API

July - Sept 2022

*Coca Cola Company*

*Manila, Philippines*

- Increased customer engagement by **55%** by scraping data from the web using Python BeautifulSoup and Google Search API to identify underrepresented audiences
- Consolidated marketing data by normalising **130,000+ data points** to reduce redundancies and minimise entry errors
- Elevated intra-organization communication by **debriefing** executives about the project via a slide-show presentation

**Full-stack Developer (NWPlus Hackathon)** | React, Node.js, Socket.io, Git

Nov 2023

*Switch!*

- Successfully designed a chat app enabling **real-time translation** between different languages, addressing the hackathon's theme of diversity and inclusivity
- Allowed instant and efficient communication between users by integrating **Socket.io** for web sockets, using **Node.js** for robust backend functionality, and employing **React** for an engaging and intuitive front-end user interface
- Spearheaded collaboration and project management by utilizing **Git** for **version control**, ensuring efficient teamwork and meeting project deadlines within the intensive hackathon environment

**Full-stack Developer (Project)** | React, Node.js, Oracle DBMS, SQL, Data Normalization

Sept 2023 - Dec 2023

*Musicultured*

- Engineered a dynamic front-end interface using React and CSS, enabling users to interact with playlist, songs and friends
- Enabled full-stack performance by pairing **Node.js** and **Oracle SQL** database on **API** endpoints, ensuring efficient data retrieval
- Facilitated team collaboration and **CI** by implementing robust version control with **Git** in a 4-member team

**Python Developer (Project)** | Python, Data Visualization, Matplotlib, Unittest

Nov - Dec 2021

*Music Data Visualizer*

- Successfully plotted how popularity of songs given tempos changed throughout time via **sorting** and **filtration algorithms**
  - Effectively **parsed CSV file** with 8,000+ data points into mutable list of song objects, accounting for null field values
  - Applied **unit and integration testing** across visualizer functionalities within various cases via python testing framework **unittest**
- 

## Other Experiences

**President/Founder, AMS Volleyball Club at UBC** | Vancouver, Canada

Dec 2021 - Present

- Garnered **150+ paid members** within one year of operation by utilizing promotional resources, social media and networks
  - Established a **structured organization** by recruiting prospective internal members and discussing organizational logistics
  - Hosted paid and unpaid events for **100+ members/non-members** by collaborating with internal and external stakeholders
- 

## Education & Achievement

**University of British Columbia**

Sept 2021 - May 2025

*Bachelors of Computer Science and Business*

**Awards:** International Entrance Scholarship and Outstanding International Student Award (\$100,000)

**Key Courses:** Data Structures and Algorithms, Software Construction, Relational Databases, Financial Modeling and Excel
